Pediatrician: Dr Wall

Phone: 630-484-3948 **Fax:** 630-484-3382

Diagnosis: Apraxias

Identifying Information and Referral:

Tahlia Romack is a 3 year, 9 month-old girl initially evaluated by speech-language pathology pn t2/2/13' She was referred by her pediatrician, Dr. John Webb. At that t[mr:, mother was concerned about her daughter's speech intelligibility; she noted a regressi, on over a 6 month period of time. Tahlia was diagnosed with a mild speech-language disorden affecting speech production and expressive language. She received weekly speech-language services from 2/1,6/13 through the present. *Tahlia was also referred for an occupationaltherapy* evaluation in october of 2013 by her pediatrician to rule out sensory processing disorder. Tahlia was evaluated iand reportedly showed auditory, tactile, oral sensory, proprioceptive, and vestibular sensgry processing problems as well as a low threshold for processing sensory information. Tahlia began weel < ly occupational therapy on tO/23/t3 through the present.
